Labour-Only Renovation & Property Maintenance Price List

Version 1.0 - Prepared May 6, 2026 - Regina, Saskatchewan

Purpose: internal quoting reference for customer-supplied materials. Use the Standard column as the default starting point, then move up or down based on jobsite difficulty.

Quick example from yesterday: glue-down vinyl room

Room size: 29 ft x 29 ft = 841 sq. ft.

Suggested labour-only pricing: \$3.25/sq. ft. x 841 sq. ft. = \$2,733.25 labour only. Use \$3.00/sq. ft. (\$2,523.00) if the floor is already very clean, level, empty, and ready.

Pricing rules / assumptions

- All prices are labour only. Customer supplies visible finish materials unless a written quote says otherwise.
- Taxes are not included. Permits, disposal fees, dump fees, parking, long-distance travel, special tools, rentals, and subcontracted licensed trades are extra.
- Basic = open access, clean/ready area, minimal cuts, no hidden damage. Standard = normal lived-in home, average prep/cuts, normal access. Complex = tight access, many cuts, stairs, damaged/uneven surfaces, small jobs, urgent schedule, or premium finish expectation.
- Use a written change order when site conditions change after work starts.
- Regulated plumbing/electrical/gas/structural work should be performed by properly licensed trades and/or under valid permits where required.
- For small jobs, the minimum charge should override the per-unit price.

Quick quote formulas

Square footage: length x width = sq. ft.

Linear feet for baseboard: measure all wall runs, subtract large openings only if you want tighter pricing, add 5%-10% waste/cut allowance to materials only.

Drywall board area: price drywall by wall/ceiling surface area, not floor area. Example: 8 ft wall height x 10 ft wall length = 80 sq. ft. board area.

Labour total: quantity x labour rate = labour subtotal. Add minimums, mobilization, prep, disposal, travel, permits, and taxes separately.

Two-person work: use two-person crew rate or add helper hours when lifting, glass, appliances, stairs, heavy doors, or safety requires it.
